

**METEOROLOGY &
CLIMATE PHYSICS**

PHYSICS

GEOPHYSICS

JOIN OUR **MASTER'S PROGRAMS** AT **KIT PHYSICS**

- You hold a Bachelor's degree in physics, geophysics, or meteorology
- You are excited about particle- and astroparticle physics, quantum materials and systems, optics and photonics, seismology or climate research

Then apply to one of our 2-year English-language Master's degree programs!

The Karlsruhe Institute of Technology is one of Germany's Universities of Excellence. At its Physics Department, you will find an extraordinarily broad range of scientific topics investigated by outstanding scientists. Unique for the German university landscape is the close combination of university education and research done in large-scale facilities of the Helmholtz Association. The department is located in the center of the city, with large scale facilities at nearby Campus North.
